WHO WE ARE

Technology That Connects Strategy to Execution

BVM Tech is an enterprise technology and digital engineering company helping organizations modernize core systems, adopt AI, connect technology ecosystems and scale technology delivery.

WE BRING TOGETHER

Business & Technology Advisory

Align priorities, architecture and transformation decisions.

Enterprise Platforms

Implement, modernize, integrate and optimize critical business systems.

Digital Engineering

Build applications, products and integrations where differentiation matters.

Global Delivery

Extend capability through specialists, dedicated teams and managed delivery.

From strategy to scale,
one technology partner.

DELIVERY METHODOLOGY

From Strategy to Sustained Outcomes

One partner across strategy, implementation, engineering and long-term operations.

WHAT WE DO

Enterprise Technology Across the Transformation Lifecycle

Advisory & Transformation

Strategy, architecture, platform advisory and transformation programs.

Enterprise Applications

ERP, CRM, ITSM, HCM, asset operations and digital experience.

AI, Data & Intelligent Automation

Enterprise AI, data engineering, analytics and automation.

Digital & Product Engineering

Applications, SaaS, modernization, APIs and digital products.

Cloud, Cybersecurity & Integration

Cloud modernization, security, resilience and interoperability.

Managed Services

Application, platform, cloud and operational support.

Technology Talent & Global Delivery

Specialists, dedicated teams, project squads and scalable delivery models.

Seven integrated capabilities.
One enterprise technology partner.

WHAT DO YOU WANT TO TRANSFORM?

From targeted improvements to enterprise-wide transformation.

Modernize Core Systems

Modernize legacy applications and enterprise platforms for greater agility and scale.

Unlock AI & Data

Turn data into intelligence, automation and better decisions.

Connect the Enterprise

Integrate applications, workflows and data into one connected environment.

Digitize Operations

Replace manual processes with connected digital workflows and automation.

Strengthen Technology Resilience

Improve cloud, security, infrastructure and continuity across critical systems.

Scale Technology Delivery

Extend capability with specialists, dedicated teams and global delivery.

**Transform today
for a stronger tomorrow.**

Greater
Efficiency

Decisions

Stronger
Outcomes

Modernize the Systems That Run the Business

BVM works across established enterprise platforms and technology ecosystems to design solutions around business requirements rather than forcing every challenge into a single technology.

AI, DATA & INTELLIGENT AUTOMATION

Turn Data into Intelligence. Turn Intelligence into Action.

Enterprise AI

- Generative & Agentic AI
- AI assistants
- Enterprise knowledge solutions

Data & Analytics

- Data engineering
- Data platforms
- Business intelligence
- Advanced analytics

Intelligent Automation

- Workflow automation
- RPA
- Document intelligence
- AI-enabled operations

Data Governance

- Data quality
- Governance
- Security
- Responsible AI

Impact

Build. Modernize. Connect.

Digital & Product Engineering

- Product engineering
- Enterprise applications
- Web & mobile engineering
- SaaS platforms
- Application modernization
- Quality engineering

Cloud & Cybersecurity

- Cloud strategy & migration
- Cloud-native engineering
- Infrastructure modernization
- Cybersecurity
- IAM & DevSecOps
- Resilience & disaster recovery

Enterprise Integration

- API management
- Application integration
- Data integration
- Middleware & iPaaS
- Microservices
- Legacy integration

LOCAL ENGAGEMENT.
GLOBAL ENGINEERING.

Combine packaged platforms with custom engineering
where the business requires differentiation.

MANAGED SERVICES & GLOBAL DELIVERY

The Right Capability. When and Where You Need It.

Managed Services

- Application managed services
- Enterprise platform support
- Cloud & infrastructure operations
- Platform administration
- L1 / L2 / L3 support
- Continuous improvement

Technology Talent

- Remote specialists
- On-site & hybrid specialists
- Dedicated technology teams
- Project delivery squads

Global Delivery

- Offshore development capability
- Global delivery teams
- Centres of Excellence
- Build-Operate-Transfer

TECHNOLOGY GROUNDED IN INDUSTRY CONTEXT

Technology Grounded in Industry Context.

Government & Public Services

Connected services, secure platforms, data and digital operations

Banking & Financial Services

Core modernization, customer experience, automation, data and security

Real Estate, Facilities & Smart Infrastructure

Assets, facilities, field operations, IoT and connected buildings

Energy & Utilities

Asset operations, field technology, enterprise platforms and analytics

Construction & Engineering

Project operations, HSE, QA/QC, procurement and digital delivery

Manufacturing & Industrial

ERP, EAM, automation and operational intelligence

Logistics & Mobility

Fleet, supply chain, asset tracking and operational visibility

Retail & Consumer

Commerce, customer experience, ERP, CRM and data-driven operations

Additional experience across **Travel, Hospitality, Healthcare and Technology** businesses.

Built for Enterprise Relationships.

Business-first advisory

Technology follows the requirement.

Platform + Engineering

Enterprise products combined with custom capability where needed.

Flexible Delivery

Projects, managed services, dedicated teams and specialist resources.

Regional Engagement

UAE presence supported by international and global delivery capability.

Long-term Value

From initial transformation through ongoing optimization.
